CAREER OVERVIEW

- Product Leader with 12+ years of expertise

SKILLS

<Refer to Skills Bank at the bottom>

EXPERIENCE

Associate Director of Product at TMRW, House of Brands (Bangalore, India)

Apr '25 – Present

Building Next Gen Products for Conversion Funnel and Post Order of Fashion D2C Brands upto \$131Mn (₹1,250Cr) of \$860Mn (₹8.3k Cr) ABFRL Group

- **Overview:** Heading a 28-member Product and Tech Pod of Product Managers, Product Analysts/Business Analysts/Data Analysts, Designers, Developers and QAs to build End to End Products in Growth Products for 4 Brands and Ops Tech for 8 D2C Brands. Working with Founders, C-Suite and Growth leaders of each Brand for Product Strategy and Tech Roadmap. Coaching and mentoring 6 Product Managers, 2 Product Analysts and 3 Product Designers for Product management and building Customer centric products. A/B tested almost every product feature for launch.
- **Brands + Growth Hacks:** Built 1.5M+ Customer base Web/App Conversion Funnel products for 4 D2C (Direct to Consumer) brands for Conversion, Growth and Scale. Conversion Funnel includes Landing page, Product Listing Pages, Product Detail Pages, Cart, Checkout and App Installs.
 - **WROGN:** Built End to End D2C Brand.com's Web/App Conversion Funnel Products, Platform tools and Growth Hacks to improve revenue by 3X, Conversion by 4x, AOV by 32% of the \$27Mn (₹260Cr) brand with D2C (online) Sales grossing \$6.3Mn (₹60Cr). Launched Mobile App (iOS and Android) and achieved 20%+ uplift in orders, 25% increase in Revenue with 5x conversion and 4x customer retention.
 - **BEWAKOOF:** Built D2C Web/App Conversion Funnel Products on Cart, Offers and Post Order improving conversion by 26%, AOV by 14% and CSAT by 3x leading the \$18.5Mn (₹175Cr) brand towards new-gen Customer Experience and Fast Delivery Offerings.
 - **VEIRDO/JUNEBERRY:** Built D2C Web Conversion Funnel Products, Platform tools and Growth Hacks to improve revenue by 2X, Conversion by 23%, AOV by 56% of the \$3.5Mn (₹30Cr) brand.
- **Growth Tech:** Built multi-tenant Growth Products which are scaled for 8+ D2C Brands for Growth and better User Experience.
 - **Post Order Tracking/My Orders:** Built custom My Orders flows connected with RMS workflows for improved Post Order visibility, communication along with Returns, Exchanges and Cancellations functionalities reducing CX tickets by 90%
 - **Special Collection Pages:** Built a custom vertical scroll PDP (Product Detail Page) for Special and Premium Collections improving Conversion by 2x and AOV by 30%. Implemented for Wrogn's IPL, FIFA Jerseys, Veirido's Center Stage, etc.
 - **Flash Sale Tools:** Built a Flash Sale Suite of Products which go live with a Single Toggle for occasional Brand Sale Events to add 4X revenue and 3x ROAS (Revenue on Ad Spent)
 - **Offers:** Own the Offers platform for Bewakoof, building for conversion and customer retention, have achieved more than 55% while achieving EBITDA and CM2 goals. Building User based coupons, referrals and gift cards as upcoming product offerings.
 - **Post Order Fraud detection:** Monitored and blocked Post Order fraudsters saving 85% of revenue leakage
- **Operational Products:** Built multi-tenant B2B and B2C operational tools that could be used by 8 brands with added customer offerings for better customer experience.
 - **Warehousing and Fulfilment tools:** Integrated closely with 3rd party OMS, WMS, LMS and RMS partners like Unicommerce, Increff, Clickpost, Shiprocket and Pragma for Order Routing and Allocation, Supply Chain Management, Warehouse Management, Inventory Management, Logistics Management and Returns Management. Built added products above the tools to provide improved Customer Experience
 - **Custom WMS tools:** Built custom tools to close process gaps in Warehouse Management and Inventory Management systems which are inherited from 3rd party WMS tools and integrations reducing processing time by 80%.
 - **Same Day/Next Day/2-hour Delivery:** Built Same Day, Next Day, 2-hour Delivery products with Pre-Order Serviceability and Post Order Fulfilment overlapping integrations and API flows on Order Routing,

Warehousing Management and Logistics Management. Processing 70% orders for fast delivery fulfilment pan India with 89%+ EDD (Estimated Delivery Date) accuracy, achieved 83% reduced RTO (Return to Origin). Fulfilled 40% of bangalore's orders by 2-Hour Hyperlocal Dark Store Delivery, achieving 95% EDD accuracy, while increasing orders per day by 15%.

- **Order Management System (OMS):** Built internal tools for Post Order Tracking, Management and Orchestration System to improve CX turnaround to 10 mins and improved CSAT upto 87%. This tool is currently used for PGA (Post Game Analysis)/RCA (Root Cause Analysis) for any customer order issues.
- **Returns Management System (RMS):** Built a home-grown Returns Management System (RMS) with Storefront MyOrders (for Order Tracking) and complete Returns Management System for Shopify brands reducing CX tickets by 90% and optimizing for cost and efficiency while expanding capabilities for Returns and Refunds with automated flows.
- **Offers Portal:** Built a multi-tenant Offers Management System increasing brand discount and offers by 40%
- **AI based Tools:** Built AI based B2B solutions for End-to-End Business Control, Planning, Growth, Operations, Analytics, RCA/PGA and Brands Overview:
 - **Operations Optimizer:** Built an AI based Supply Chain Operations Optimizer/Control Tower to improve Operations Speed by 5x and reaching Order Fulfilment Accuracy to 98%. Built AI based tools for Inventory allocation, monitoring and efficiency improvements. This tool is currently used for PGA (Post Game Analysis)/RCA (Root Cause Analysis) for any Operational issues.
- **OTB:** Built an AI based OTB (Open to Buy) tool across 8 brands to standardize Purchase Planning and improve the Purchase Efficiency for accurate Category level forecasting and brand spend on Inventory.

Achievements: Awarded ABFRL 'Customer Centricity Excellence with Tech' for Bewakoof Customer Experience

Group Product Manager at Coupang Eats (Seoul, South Korea)

Apr '22 – Apr '25

Led Restaurant and Delivery Efficiency products of \$15bn Korea's fastest Food Delivery service, grew 7x in 2Qs

- **Overview:** Led the Order-Driver Assignment Algorithm, Delivery and Restaurant Products to make Coupang Eats the Fastest Food Delivery of South Korea. Built Web and App based products to for 200k+ Delivery Drivers, 350k+ Restaurants to process 2.5mil+ Orders per day and grew 7X Sales in 3 Quarters. Food Delivery is hyperlocal.
- **Assignment Product:** Owned and Revamped Driver search and allocation algorithm to improve speed and cost.
- Redesigned the driver allocation algorithm and reduce delayed Tail End deliveries by 16% while using the resources from early deliveries
- Improved Avg Order Pickup and Drop Off time by 5 mins by implementing driver behavioral features
- Ideated, Designed and Implemented an 'Optimized Delivery' product to improve average delivery time by 12 mins, 7 mins during Bad Weather conditions, Driver shortages and decreased Delayed Orders by 9%. This Optimized Delivery product later got reskinned as Coupang Eats' flagship 'Free Delivery' for WOW (Coupang's Loyalty program) and achieved 70%+ Customer Opt-in
- **Target Pickup Time:** Formulated a common 'Target Pickup Time' between Drivers and Restaurants along with ML based Prep Time Guidance system with Data Science models for Restaurants reduce food pickup wait by 34% and Driver wait time by 26%, improving overall Delivery Speed by 9 minutes and ETA Accuracy by 27%
- **WOW Launch:** WOW is Coupang's 14mil+ userbase Loyalty program. Built Coupang's Flagship Loyalty (Coupang WOW) into Coupang Eats to increase sales by 7x sales in 3 quarters. Strategized and launched the **MVP** of Eats' flagship 'Free Delivery' service with 70%+ Customer opt-in rate
- **Delivery Product:**
 - Owned Web and App products for 200k+ Drivers for Operational and Order Fulfilment of 2.5mil+ Orders a day
 - Built and internal **Weather Control Center** for operations of riders to control bad weather response actions within **less than 2 min of response time** resulting in a stable Rider Supply and reducing order delivery delays by ~30%
- Built a **3PL Vendor Portal** and Custom Driver App for 3PL Vendor and Drivers to increase Delivery supply by 60% +
- Rebuilt the complete accounting and settlement modules, added self-help features for drivers, optimizing onboarding processes, order information access, and daily settlement details, reducing support center calls and saved 35 manpower resources and 64% of CX queries
- Redesigned Driver UI and location-based Food Pickup/Drop Off constraints and reduced mis-deliveries by 78%. Followed concepts from 'Don't make me think by Steve Krug
- **Restaurant Product:**
 - Owned Web and Mobile products suite for 300k+ Restaurants processing 2mil+ Orders a day
 - **Revamped Merchant/Restaurant POS** (Point of Sale) App to achieve 98.7% order completion, reduced 75% of New Store onboarding training time

- Redesigned **Rider Communication** in Store POS with Rider Location Notifications to reduce Rider wait time by 26%
 - **Busy Mode:** Enhanced Customer Communication features for **'Busy' restaurants** to improved Delivery accuracy by 34%
 - Equipped Restaurant POS with Customer visibility features for cohort-based service, resulting in improved Repeat Orders by 21%
 - Improved Store Coupon Issuance product with easy to use and **1-click** templates increasing 13% orders per day
 - **WOW Stores:** Strategies, Designed, built and improved **Store Selection, Accounting and Settlement** products to pick and choose restaurants for the WOW offering. Automated the process and saved 3000 manhours per day
 - Contributed to a substantial increase in YoY growth in market share with increased orders per store up to 14%, by boosting coupon issuance by 13% with easy-to-use coupon templates, catalog and store management features
 - Rebuilt the accounting and settlement modules for Restaurants reducing CX calls by 42%
- Achievements:** Korean Patent Applied for ML based Food Prep Time guidance and communication product | Best Impactful Product of the Quarter for 3PL Logistics Vendor Portal and Rider's App

Senior Product Manager at Purpille.com (Mumbai, India)

Nov '19 – Apr '22

Built End-to-End home-grown enterprise products for \$31mn business, supporting 10x demand growth in 2 years

- **Overview:**
 - Led a 10-member tech team of PMs + BA, Engineers and QAs to build home grown End-to-End Internal Operations products for Catalog, Category, Supply Chain and Finance products to handle 9k+ orders per day with ability to handle Sale surge of 7x orders. Specialized in building Supply Chain products for speed, cost and efficiency. Conducted daily scrums and sprints for Product.
 - **Demand and Inventory Planning:**
 - Rebuilt End to End Inventory Products for Demand Planning, Procurement, Inventory and Return to Vendor
 - Redesigned Inventory management logics to release 41.7% close of expiry inventory and Return to Vendor costs. Introduced Inward Freshness and FEFO fulfilment techniques to maintain maximum shelf life of products
 - Improved Inventory Planning tools by implementing lean demand planning logics and released 32% working capital
 - Built auto-replenishment products to reduce manual PO planning and creation time by 35 manhours per day
 - **Home Grown WMS System:**
 - Built a complete Home-Grown WMS System from scratch for D2C Order Fulfilment
 - Used Lean Management techniques and Reduced Order to Dispatch time by 73.6% by aggregating and optimizing the fulfilment processes, increased operational capacity to 4x
 - Built one touch shipment packaging portals with automation, reducing overall time by 23%
 - **Covid-19 Compliance**
 - Led the Org wide Covid compliance transformation and single-handedly championed product, category and supply chain changes within 2 days
 - **Courier Allocation:**
 - Built and optimized a courier allocation algorithm to reduce 23% 3PL delivery cost and improved 35% logistics time
 - Built the Courier Allocation algorithm based on courier cost calculation logics based on weight and volume
 - **Same Day Delivery:**
 - Conceptualized and launched same day/next day delivery capabilities, resulting in a significant 17% increase in orders per day at pilot locations
 - **Hiring:**
 - Hired and mentored 15+ Business Analysts and Product Managers for the Org; made them Org ready within 4 weeks. Single handedly screened, planned and executed hiring for this whole charter
- Achievements:** Awarded Life-saver for leading org wide product transformation for Covid-19 compliance | Awarded Best Product of Quarter for improved demand forecasting and inventory products

Product Manager at Reliance Jio/Digital/Retail (Mumbai, India)

Apr '17 – Nov '19

Transformed E2E Supply Chain products of India's largest Retail of \$5.7bn and world's largest 4G telecom launch

- **Overview:**
- Spearheaded the digital transformation and end-to-end lifecycle of Supply Chain and Logistics products, managing distribution of Electronics, White Goods, and Jio digital devices across 11,045+ inventory, fulfilment and sale locations pan India — including 1,100+ regional offices called Jio Centers, 11k+ Urban and Rural Retail stores called Jio Points, 45 warehouses, and— handling 10mil+ inventory movements/sales daily, with

automation and solutions built for users ranging from Novice to Professional. Also built the CAF/CRF documentation archival, retrieval flows for TRAI regulations

- Primary responsibilities: end-to-end business strategy, process design, and architecture/requirements development; conducting stakeholder meetings for requirement gathering and defining deliverables; handling product rollout, change management, and process implementation; performing User Acceptance Testing and Governance & Risk Compliance support; continuous gap analysis and pain-point monitoring/optimization of existing processes; process automation and continuous improvement to boost user productivity; UI updates based on user feedback with fool-proofing; product lifecycle management and platform readiness for planned business requirements; and support for application bugs/process gaps to ensure smooth operations
- **Jio Phone Launch:**
- JioPhone is India's first 4G supported Feature Phone launched by Jio for Rural India. There were multiple variants of JioPhones manufactured by multiple vendors with varied functionalities. JioPhone launch was one of the most awaited launch of India which started as Voucher/Invite based.
- Conceptualized Voucher based Interest/Invite Aggregation, Order-Variant-Inventory allocation and Supply Chain of 6mn+ Jio Smart Feature Phones called JioPhone. Worked on Procurement to Supply to Sale to Activation of JioPhones to Pan India
- Devised Voucher based Order Management/Aggregation for 6mn+ vouchers/leads and executed a pull strategy on Pin code segregation for the Jio Phone launch; enhanced Variant Management by building a FIFO-based aggregation tool
- **Inventory Forecast and Stock Count/Physical Inventory:**
- Configured, customized, and implemented auto Forecasting and Inventory Replenishment solutions using SAP MM, MRP, and F&R modules, saving \$35k (₹33lakh) per month in planning and working-capital costs up to \$105k (1Cr) in planning efficiency/budget, and improving planning accuracy to 10 days of inventory
- Customized and implemented SAP Forecasting and Replenishment Module for Inventory/Supply Planning
- Built system-based Physical & Perpetual Inventory processes at Jio sites with linked Write-Off/Write-In steps ending in book-of-accounts updation; enhanced/optimized scanning capabilities for portable devices (e.g., MC40) via device-agnostic Inventory Audit processes for Retail Stores, enabling scanning speed of 200 qty/min
- **FTTx (Fibre to Home) Launch:**
- Conceptualized order aggregation, fulfilment, and work-order workflows and device supply between 15+ cross-functional products/teams for the Market Launch of Jio's 50k+ Fiber-to-Home devices
- Built Work Orders flow, Service Engineer Issuance, and inventory Capitalization for FTTx devices and consumables for respective site-based cost centres
- Conceptualized and built E2E SCM and payment processes for 50k+ FTTx, including partner issuance and (off-platform) sales with sub-contracted kitting processes and 100% serial number visibility/shipment tracking.
- Built SIM and FTTx Kitting Sub contracting processes for home installation/assets
- **Jio Points and Jio Centers:**
- Conceptualized, Designed and Built a Retail Store Super App for Store Operations for Jio Points called JP Works and JioWorks for Jio Centers. Optimized and improved the speed of these apps to work on low spec devices.
- Automated and reduced 83% of operational activity time for JioPoints and implemented Lean Management techniques
- Built the Onboarding of 1100+ Jio Point Stores in Rural India and built a complete offline business for Reliance Digital achieving 3 days TAT of Purchase to Delivery Pan India
- **Jio-Prime Merchant POS:**
- Scoped and Built the Jio Prime Merchant POS Go to Market strategy along with building Super App for Merchant Store Operations
- **User Onboarding & Authorization**
- Simplified, Streamlined and implemented automated authorization and onboarding (auto ID creation and authorization into all relevant systems/job roles) for 1+ million SCM users pan India, reducing auth assignment time to less than 5 hours during onboarding
